

How To Make Your Own Dinosaur Mobile

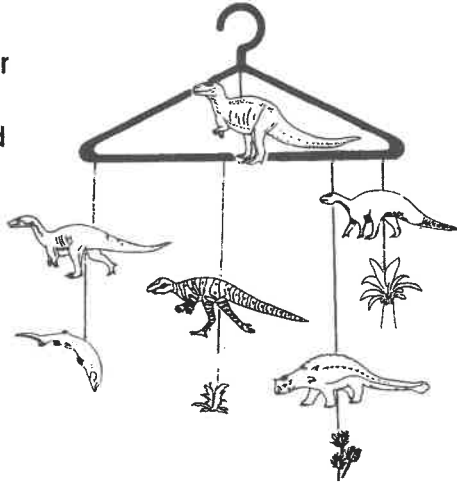

YOU WILL NEED:-

A wire coat hanger and some thin string/thread.

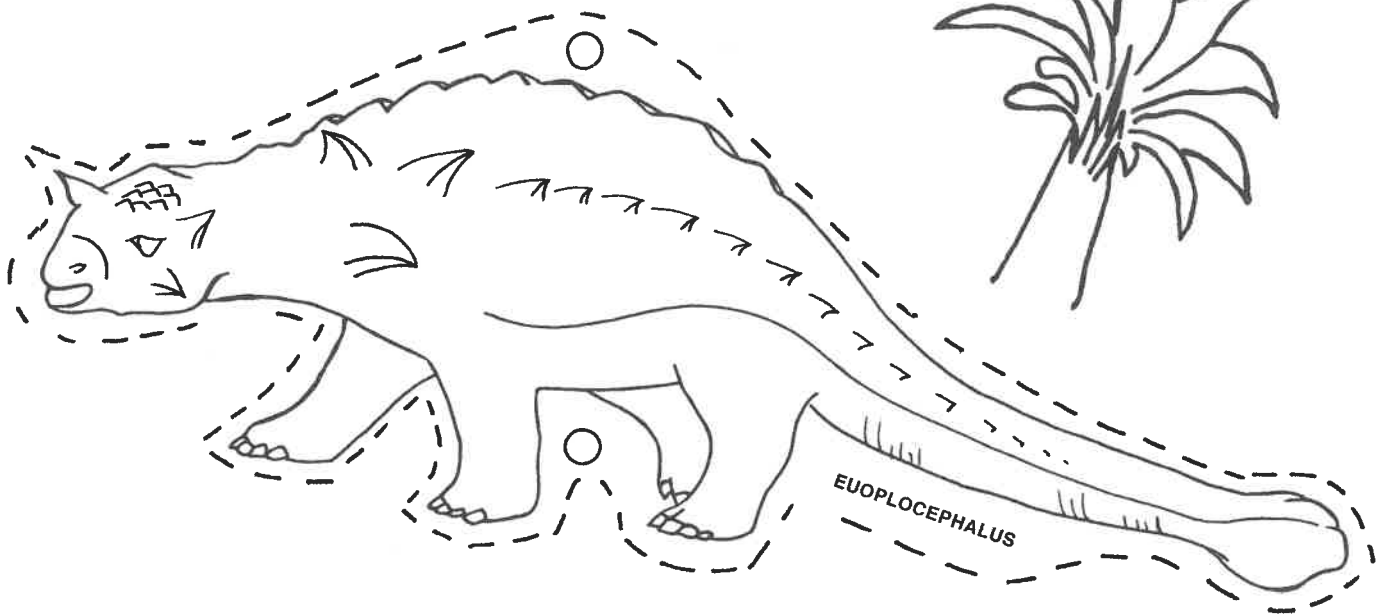

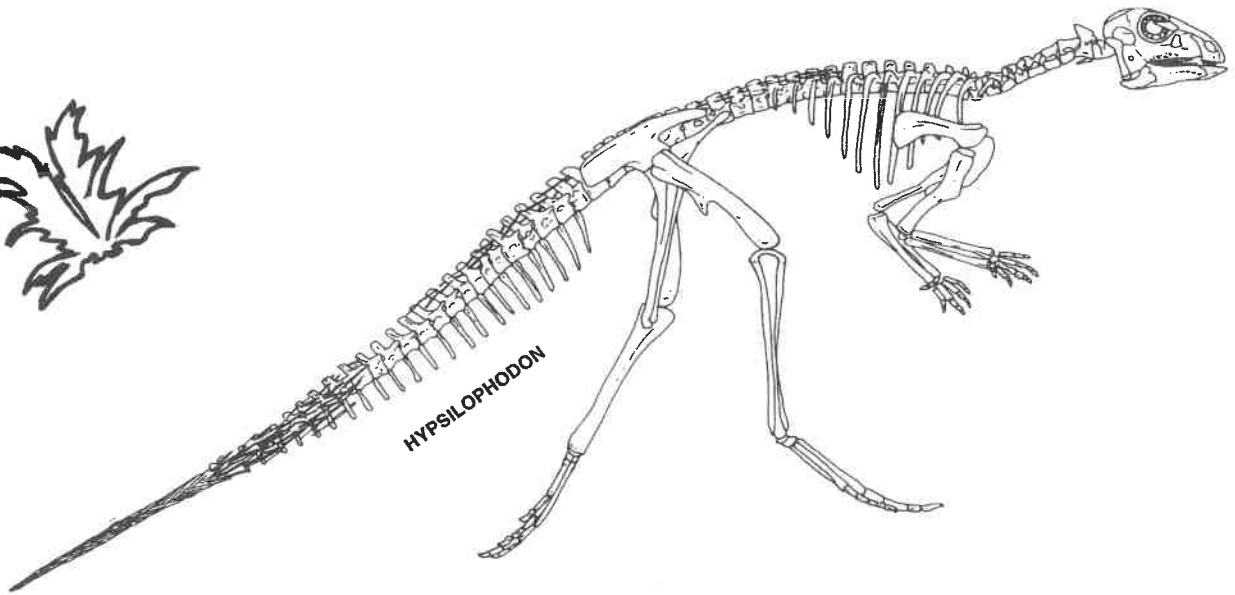

1. Using crayons or felt pens colour each animal and its food then carefully cut along the dotted lines around each drawing.

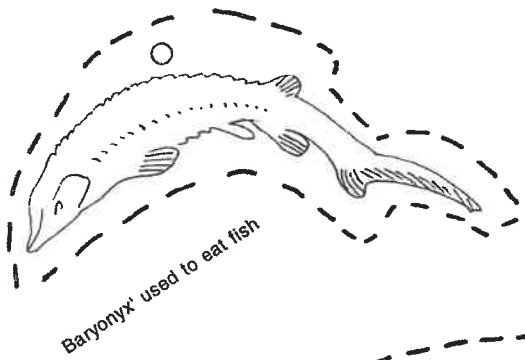

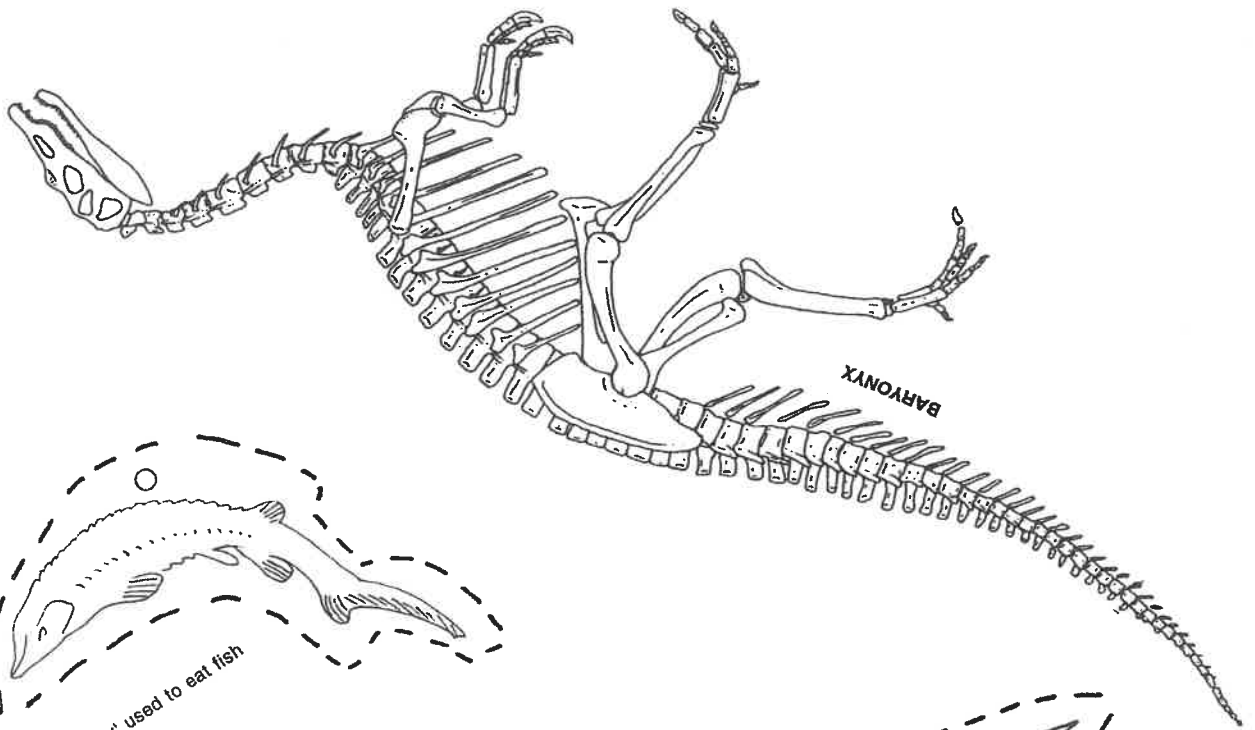

2. Using a pencil pierce a hole through the circle at the top of each dinosaur to make a hole to thread the string through.

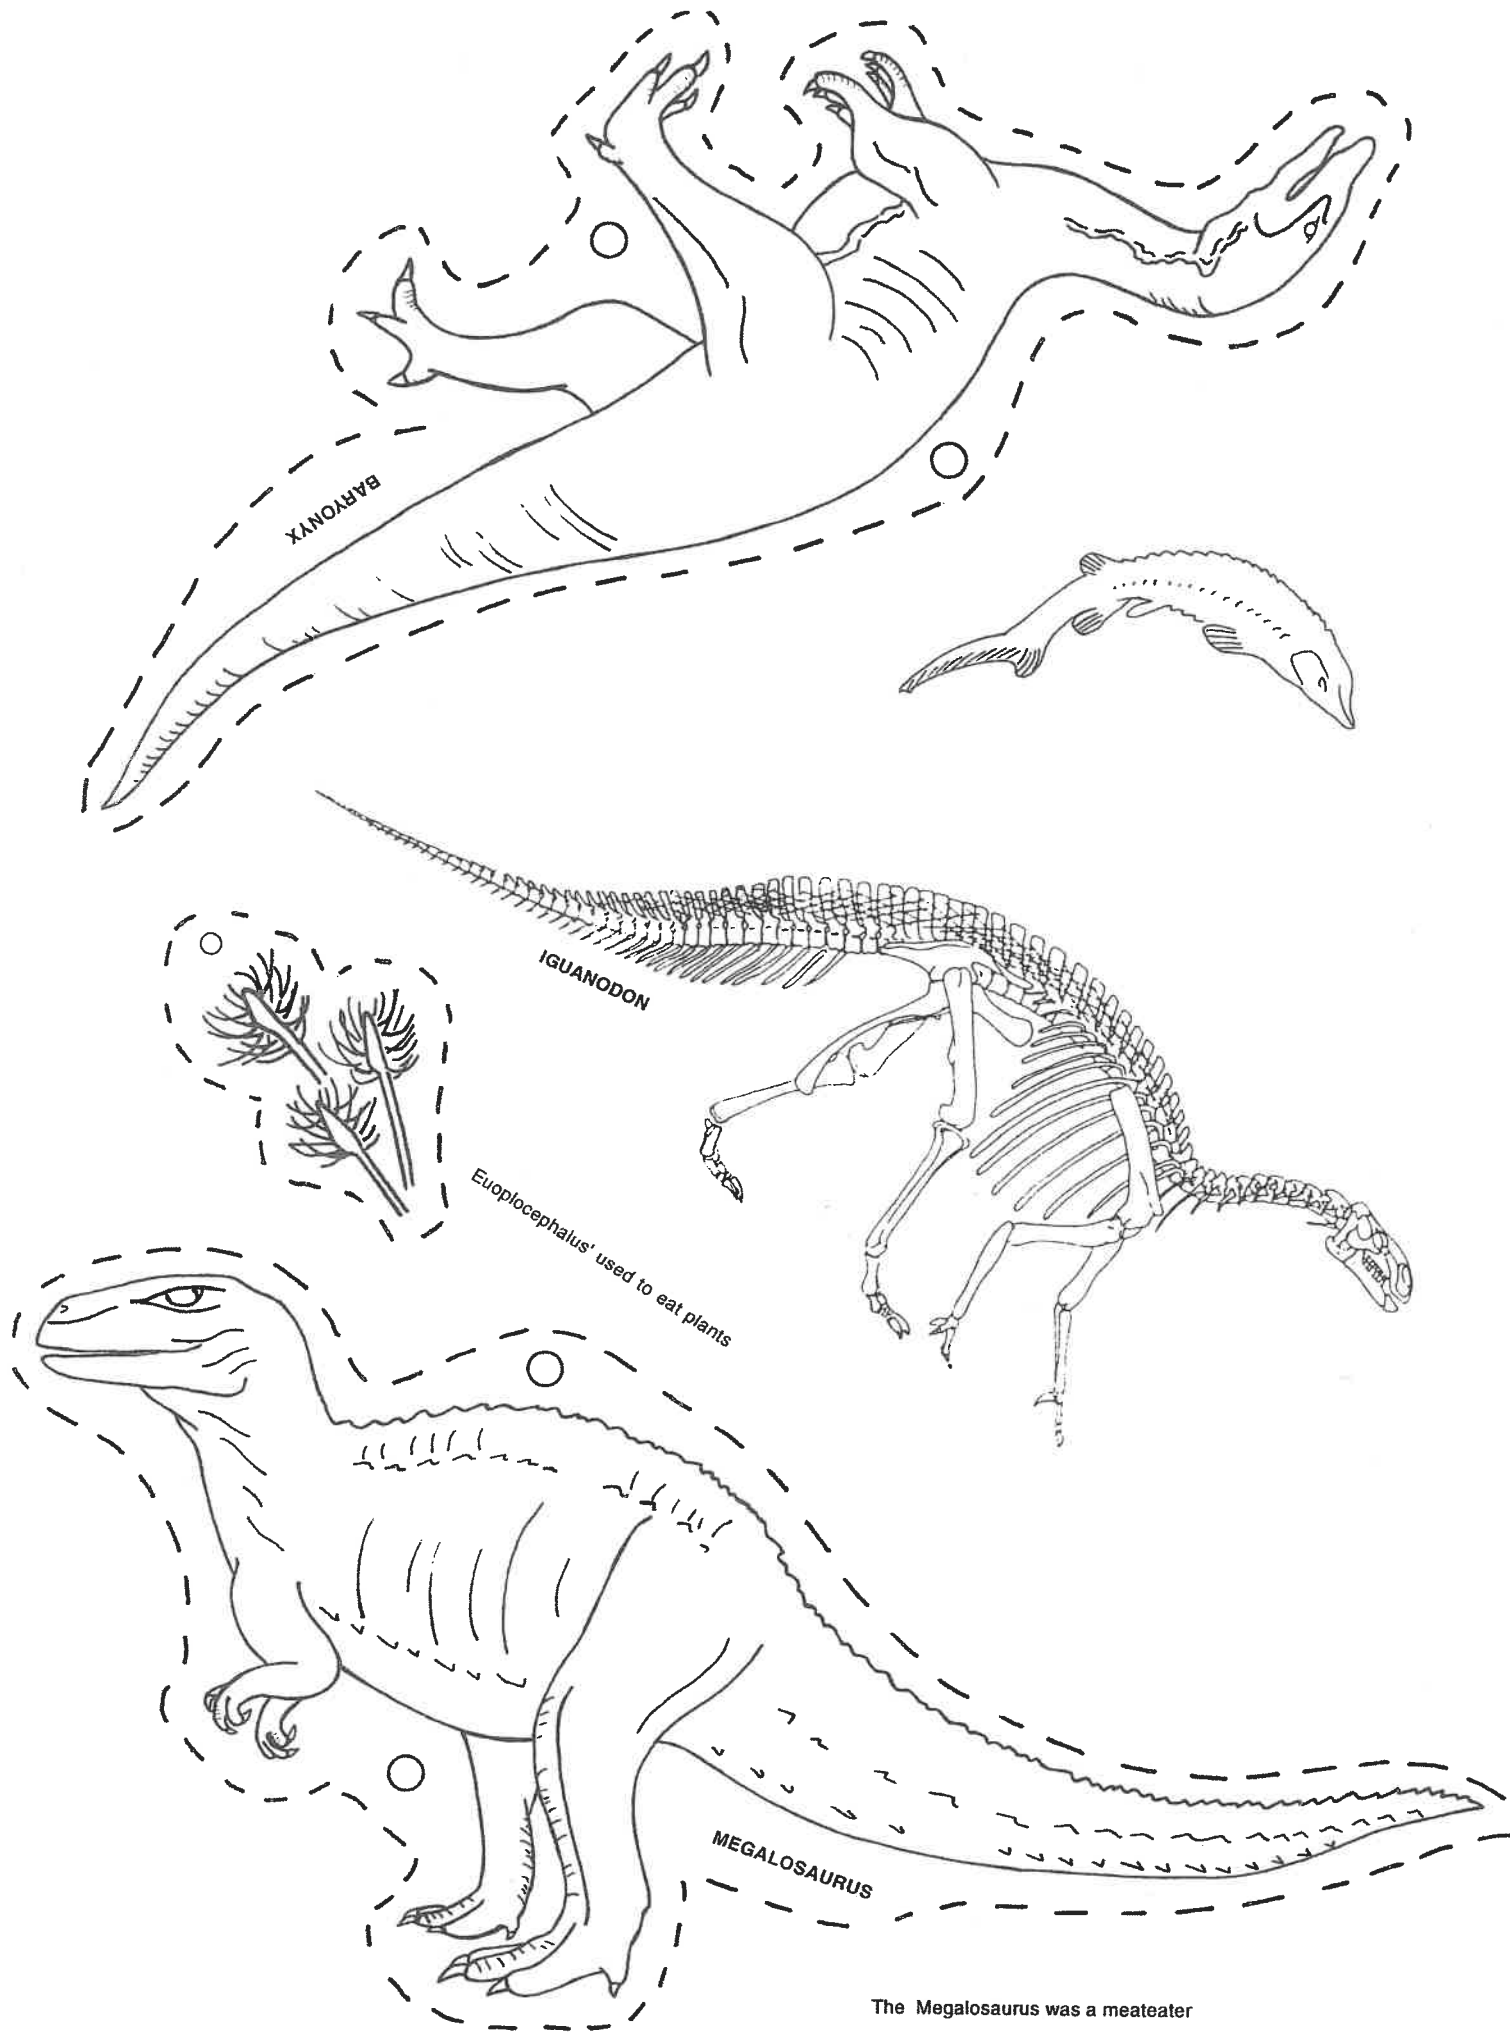

3. Thread the string through the hole using short lengths for some dinosaurs and long for others and tie to the coat hanger (see diagram).

4. Do exactly the same with the food pictures but tie these to the bottom of the dinosaur.
